SIDE SEAL
PLASTIC STRAPPING
MACHINE

- Quick-change technology
- Unparalleled durability and flexibility
- Simplified maintenance and operation

MH-P

SIDE SEAL PLASTIC STRAPPING MACHINE

A significant innovation for unitizing applications, the MH-P provides consistent, retained strap tension, improving package integrity throughout the transportation cycle. Built with fewer parts and with features that facilitate easy maintenance and operation, the MH-P provides the lowest cost of ownership available in a side seal strapping system.

Multi-level tensioning system

The MH-P's innovative tensioning system equalizes the strap tension from the top and bottom to provide more accurate strap tension that stays consistent throughout the cycling process.

Maximum versatility

The MH-P, available in multiple chute sizes with a number of options, is ideal for a wide range of packaging applications and can be easily integrated into most production lines.

MHC Modular Strapping Heads

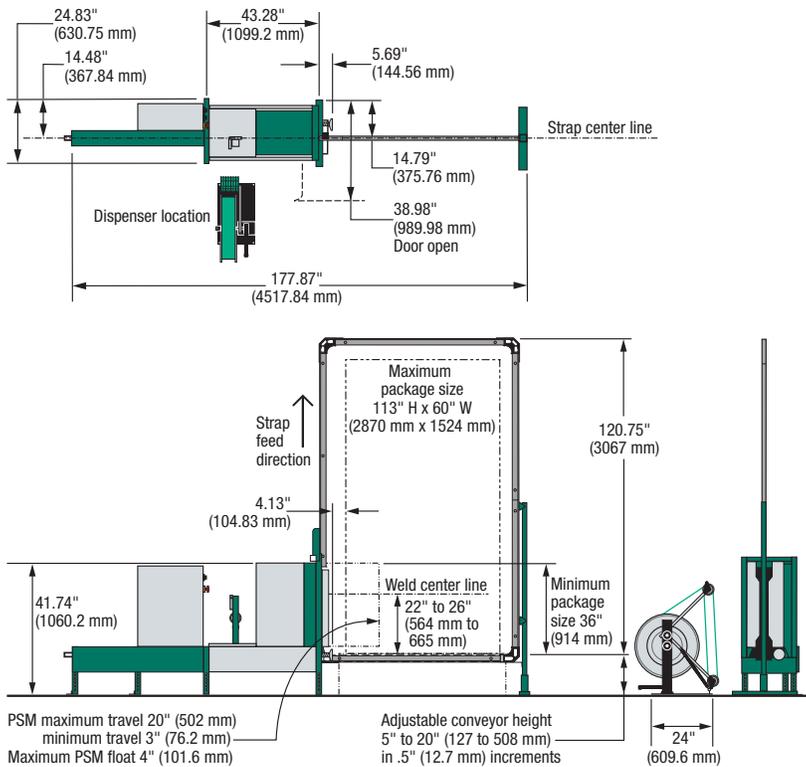

Easier to operate

Constructed with fewer moving parts and more durable wear parts, the MHC strapping head modules cost less to maintain than other plastic strapping heads.

Less downtime

Separate, lightweight tensioning and sealing modules are easy to access and remove for maintenance, drastically reducing downtime. When switching to a spare module, the MH-P can be up and running in minutes.

Specifications

Load height

Minimum: 36" (914 mm)
Maximum: 113" (2870 mm)

Load width

Minimum: 30" (762 mm)
Maximum: 60" (1524 mm)

Strap requirements

1616 ELC and 1716 LC Tenax polyester strapping

Tension

Up to 180 lbs.

Conveyor height

Adjustable 5-20"

Electrical

460 volts, 60Hz, 3 phase; UL Approved panels

Shipping weight

1,300 lbs to 2,100 lbs (590 kg to 953 kg) depending on the model.

Options

- Spare head
- Strap applied finger
- Light tower
- Underfeed chute
- PVFA
- Compression
- Ethernet
- Dual tension
- High leg kit
- HMI
